VISION

We imagine a future where 1888 ev becomes synonym to green energy to become one of the largest provider of electricity to ev car owners where millions of people uses are services through are app 1888

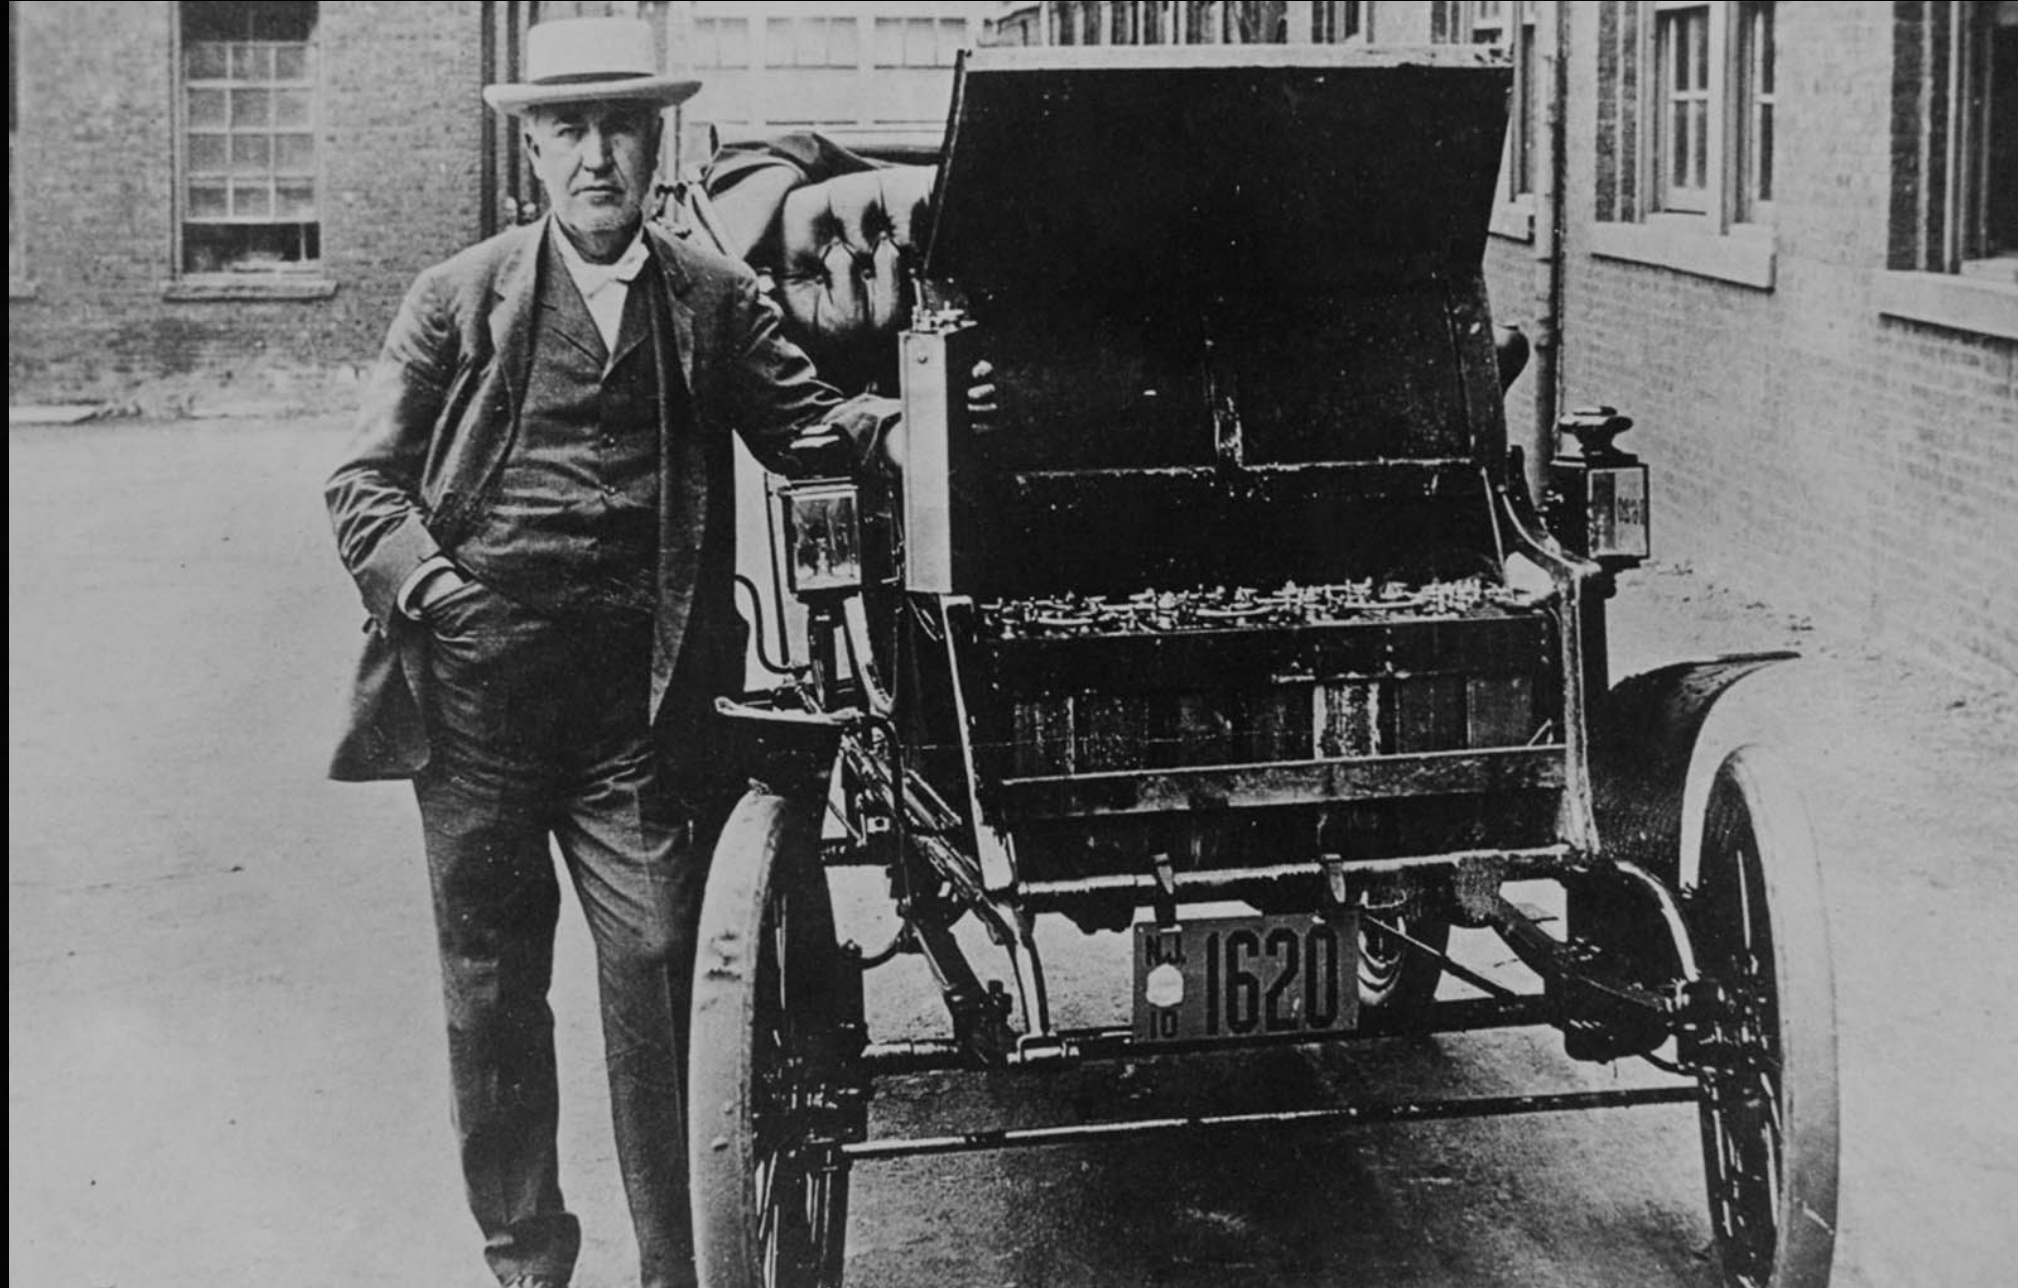

MISSION

We aim to eliminate the term "range anxiety" from the vocabulary of EV car owners by establishing a robust infrastructure of EV charging stations.

OUR STORY.

The name "1888 EV" pays homage to a **significant milestone in automotive history**. In 1888, the Flocken Elektrowagen, widely recognized as **the first electric car**, debuted in Germany.

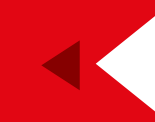

This pioneering invention by the visionary inventor Andreas Flocken marked the dawn of electric mobility. Inspired by this historic event, we at 1888 EV **strive to continue the legacy of innovation** and propel the electric vehicle industry forward into a sustainable future.

What We Do

At ONE888 EV, we're not just building charging stations; we're crafting a sustainable tomorrow. Our comprehensive approach involves strategically situating electric vehicle chargers in locations that seamlessly integrate into the daily lives of EV owners. By partnering with businesses, we integrate charging seamlessly into daily activities, creating a widespread network to drive EV industry growth. Imagine effortlessly charging your vehicle while enjoying a meal, shopping, or working we're making it happen!

PREPARING FOR AN ELECTRIC INDIA

ONE888EV ADVANTAGE

From initial consultation to scheme design, installation of hardware and software, and commissioning of the charge points, we'll manage every stage of the process.

Increased Footfall

Partnering with 1888EV ensures a steady flow of customers to your premises as the demand for electric vehicle charging grows across India. Our extensive network of rapid EV chargers attracts a diverse customer base, driving increased foot traffic to your business.

Increased Dwell Time

Because of our strategic location, customers are likely to explore amenities, which in turn benefits us, as customers stay longer and utilize our charging facility.

Build Your Reputation

Stay ahead of the competition by embracing the future of transportation. As India moves towards a sustainable automotive landscape, positioning your business as an EV-friendly destination enhances your reputation and attracts environmentally-conscious customers.

Additional Revenue Stream

With the 1888 EV app, you simply need to check the application dashboard from home. You receive your payment directly in the bank, without worrying about operation and maintenance, ensuring a hassle-free income stream for you.

WE TAKE CARE OF THE DETAILS SO YOU DON'T HAVE TO WORRY.

We Address Your Needs So You Can Focus on Your Business

ONE888EV'S MISSION FOR THE WAY FORWARD.

At 1888EV, our mission is to pave the way for your journey ahead, ensuring seamless transitions and efficient outcomes at every turn. From initial consultations to scheme designs, hardware and software installations, and charge point commissioning, we meticulously oversee each stage of the process.

CUSTOMIZED EV SOLUTIONS

Discover our tailored EV solutions designed to meet your unique needs if you're looking to integrate EV charging into your infrastructure. We have the perfect solution for you. Our team will work closely with you to understand your requirements, ensuring seamless integration and maximum efficiency. With our comprehensive range of services and cutting-edge technology, you can trust us to power your journey towards a sustainable future.

CATERING TO SURGING DEMAND

As the number of electric vehicle owners grows steadily, the demand for accessible EV charging points is on the rise. Our comprehensive network ensures that drivers have convenient access to charging facilities, meeting their evolving needs seamlessly.

Listen

Our seasoned team attentively listens to customer needs and objectives, understanding the requirements of customer end-users and customer aspirations for EV charge point installations.

Research

We conduct thorough site visits and meticulously assess the electricity supply to determine the available capacity for charge points, ensuring precise planning and execution.

Design

Drawing from our insights and site evaluations, we craft bespoke scheme designs tailored to the unique needs of your site and end-users, prioritizing functionality and efficiency.

8 STEP PROCESS TO GUIDE YOU THROUGH YOUR EV JOURNEY

1. Site Identification and Agreements:

Secure prime locations and necessary agreements for infrastructure development.

2. Feasibility Study and Preparation:

Assess site viability and prepare for construction, including necessary permissions.

3. Consultancy and Planning:

We listen to your objectives and understand your needs to ensure project alignment.

4. Infrastructure Setup:

Construct civil and electrical infrastructure to support EV charging stations.

5. Equipment Procurement and Installation:

Source and install state-of-the-art EV charging equipment for optimal performance.

6. Testing and Launch:

Ensure smooth commissioning and testing before launching charging services.

8. Maintenance and Expansion:

Provide ongoing maintenance, support, and plan for future network expansion.

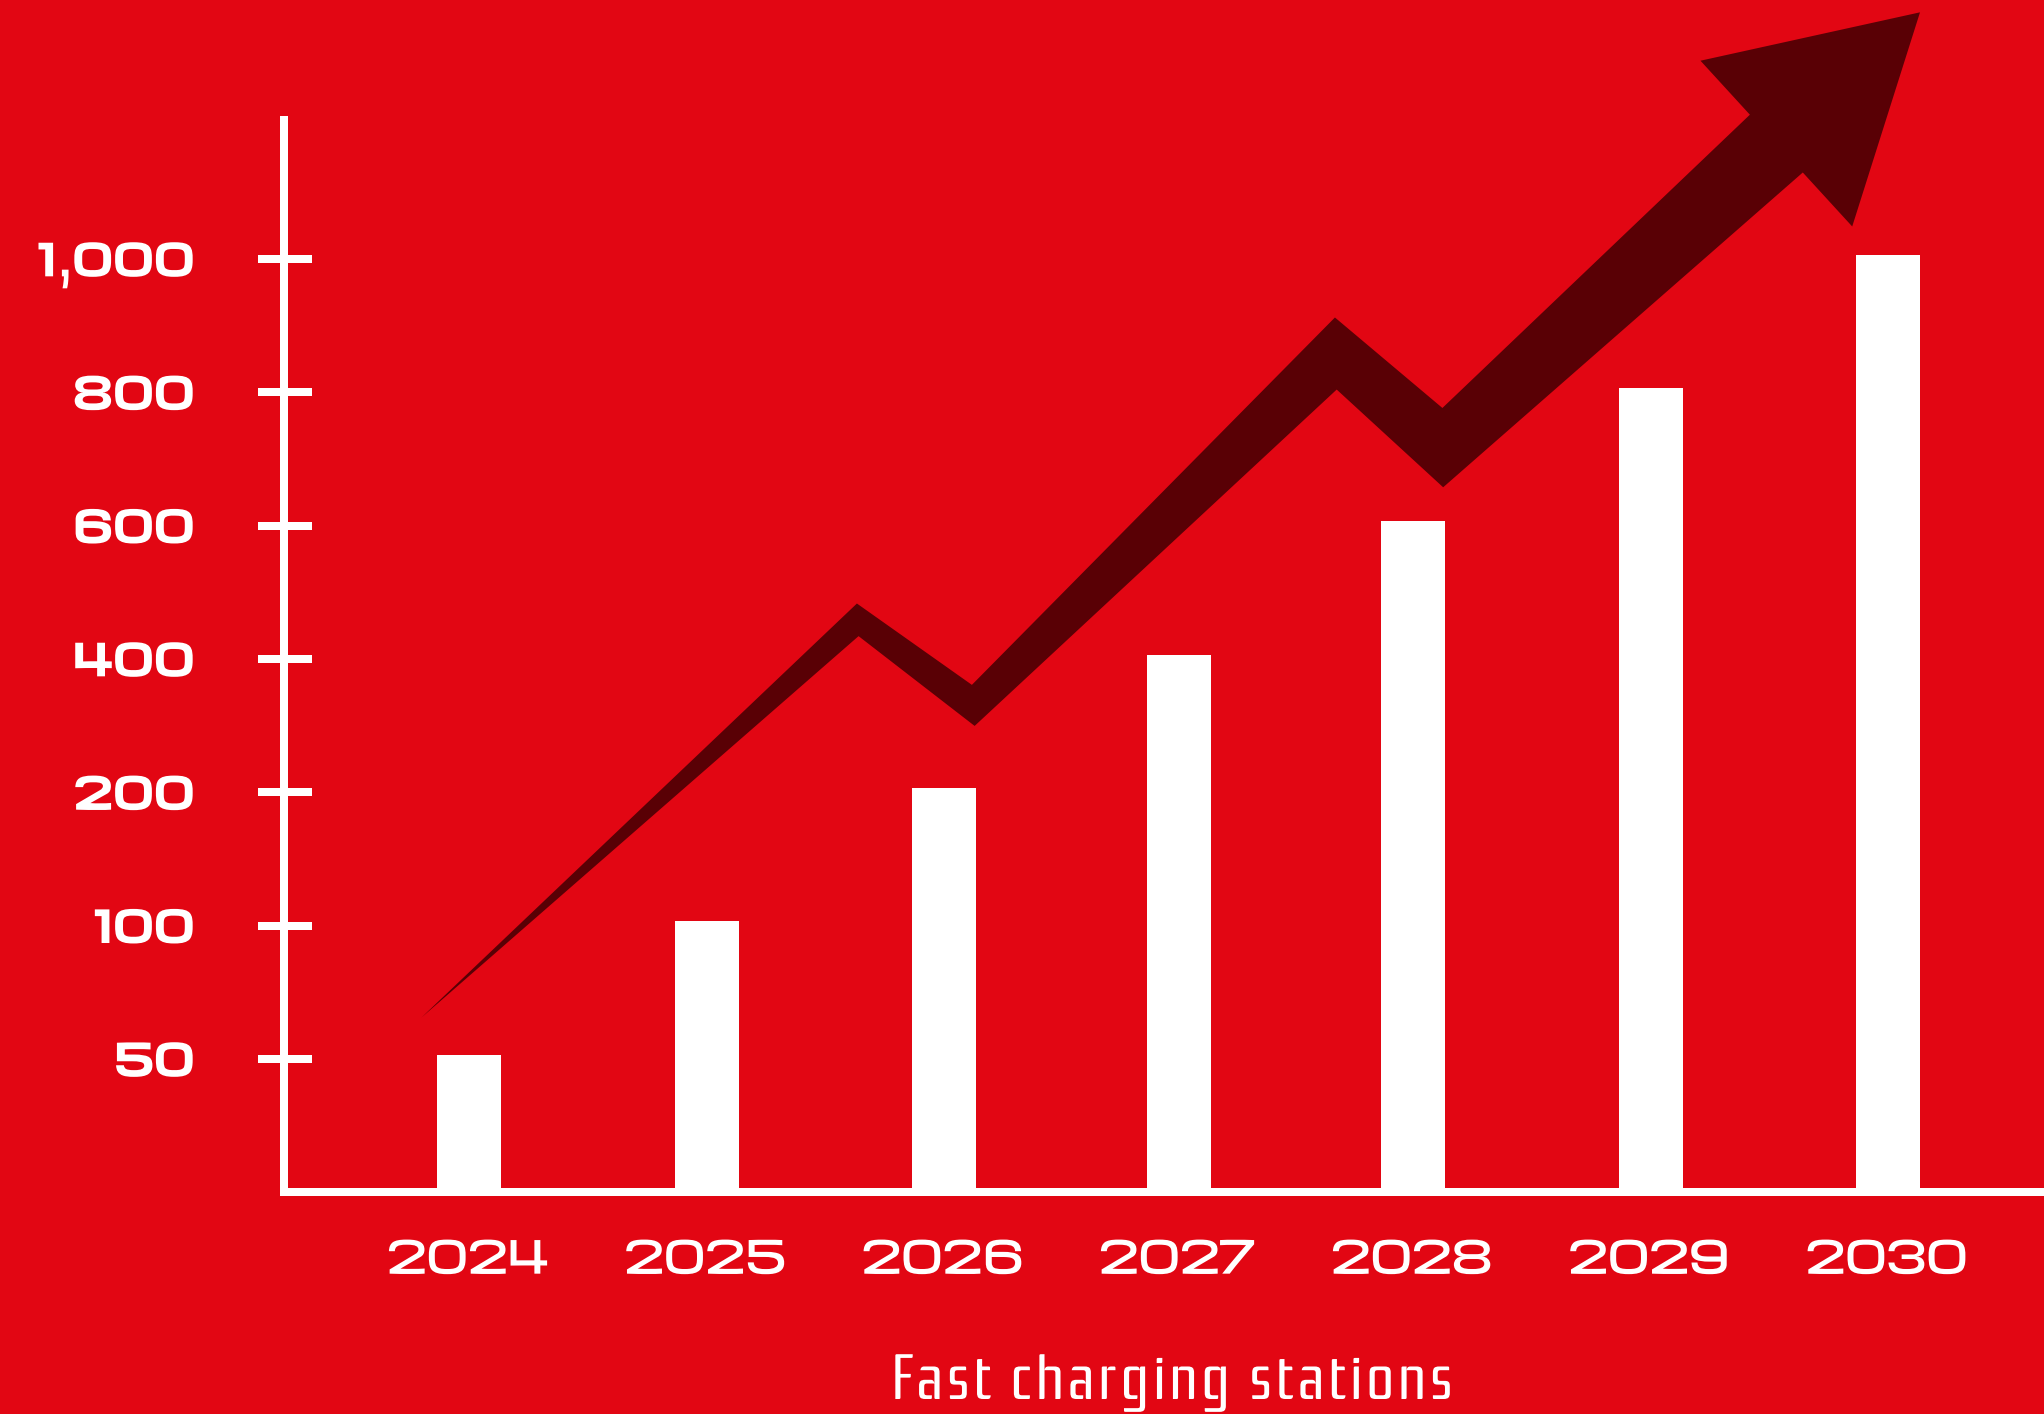

7. Branding and Marketing:

Develop brand identity and execute marketing strategies to attract users.
